SUMMARY

Junior software developer with a foundation in computer science theory, currently studying LAMP+J stack. Focusing on JavaScript, Java and PHP. Currently building responsive web applications using these technologies.

TECHNICAL SKILLS

- JavaScript, HTML, CSS, PHP, MySQL.
- LAMP stack, Bootstrap framework, jQuery, Laravel.
- Java, C++.
- Introduction to UNIX and Linux Operating Systems.
- Personal Computer Hardware (PC pro A+ certification).
- NetBeans, jGRASP, Dev C++, and Komodo, Sublime (IDE's, Text Editors).

SOFTWARE PROJECTS

Personal Site

- Personal website containing information about myself, my resume, portfolio and skills. Built using HTML, CSS, JavaScript, jQuery.

Starwars Wiki

- Star Wars wikipedia single-page application built using HTML, JavaScript, and jQuery. Application pulls data from Star Wars API. using AJAX requests.

Simple Simon

- Memory-based game constructed with HTML, JavaScript, and jQuery. JavaScript functions highlight pattern which user must recreate by clicking on interactive colored buttons.

Weather Map

- Map application that displays weather report for a user-inputted city. jQuery and AJAX requests input data in real-time from the Google maps API and Weather Map API.

Calculator

- Calculator app developed using HTML, JavaScript, and jQuery. Backend logic executed using JavaScript functions.

EDUCATION

Autonoma University • Electronic Engineering • (2010-2012) • Cali, Colombia
San Antonio College • Computer Programming • (2013-2015) • San Antonio, TX
UTSA • Computer Science • (2016) • San Antonio, TX
Codeup • (2016) • San Antonio, TX
